## IN THE CLAIMS

Please add the following new claims 67-73 to the application.

a user over the Internet, comprising:

storing a plurality of graphical objects, each graphical object including a link to further information on the Internet that can be invoked by a user, and having an associated click-through percentage and cost-per-click; and

displaying at least some of the graphical objects on a webpage displayed to a user, wherein the graphical objects are arranged using the product of the click-through percentage and the cost-per-click associated with the respective displayed graphical objects.

- 68. (New) The method according to claim 67, wherein the displayed graphical objects are arranged in decreasing order of said product.
- 69. (New) The method according to claim 67, wherein each graphical object includes at least one of graphic and text symbols.
- 70. (New) The method according to claim 67, wherein each graphical object is one of an advertisement and a topic title.
- 71. (New) The method according to claim 67, wherein a stored graphical object may have associated with it at least one constraint on the display of the graphical object.
- 72. (New) The method according to claim 71, wherein the at least one constraint includes at least one of a restriction on pages or positions where the graphical object may be displayed and a restriction on a demographic variable of a user to whom the graphical object should be displayed.
- 73. (New) The method according to claim 67, wherein the click-through percentage is based, at least in part, on the prior performance of the graphical object.
